

The Entrex Carbon Market was founded to create an efficient, regulatory compliant, platform to buy, sell and retire Carbon Offset Securities.

Today our regulatory compliant trading platform provides an efficient solution to buy, sell and retire verified, securitized, carbon offsets.

ENTREX CARBON MARKET JOINT VENTURE

The Entrex Carbon Market was created through the execution of a Letter of Intent Agreement which created a joint venture between the Entrex Capital Market, LLC and Universal Solar Technology Corp (OTC:UNSS), a public company.

The mission of the joint venture is to bring capital and technology together using Entrex's proven IBM Hyperledger technology to bring safety, security and efficiency to the trading of environmental securities.

Press release available [click here](#).

NET ZERO ANALYSIS

Net Zero works together with Entrex to reduce carbon emissions through renewable energy market transformation.

Working with international offset verifiers and producers Net Zero Analysis helps entities gain access to the Entrex Carbon Market and assisting in professional origination; maximize visibility and placement.

ISSUER DOCUMENTATION PROCESS

The Issuance process has been well proven across regulated market constituents and allows all parties comfort in the proven listing and trading process.

CARBON OFFSET ISSUER PROCESS

Issuers of Carbon Offsets can sell their securitized Carbon Offsets on the Entrex Carbon Market by working together with Entrex Market Members.

Entrex Carbon Market Members can assist you through the Licensing, Documentation, Listing and Sales of your Offsets. The following is a simplified process for an Issuer:

LICENSING

Issuers must first execute a Licensing and Servicing Agreement on behalf of the specific vintage of Carbon Offsets.

Alternatively an Issuer may Assign the rights of the offsets to a Licensed Entrex Market Member who will represent a Carbon Offset Producer's Carbon Offsets.

DOCUMENTATION

Each Carbon Offset Vintage must be documented by United Nation/World Bank Project Documentation, Project Monitoring Report and then subsequently Project Verification and Validation.

SECURITIZATION OF VINTAGE SERIAL NUMBERS

Similar to a "Buy-Order"; owners can electronically issue their owned certificates for sale via a "sell order" from their Entrex Owner Portal. Any owned certificates can also be retired from the Portal.

ISSUER - VINTAGE SELL PRICE

Each Carbon Market Issuer starts the sales process once all securitization is complete by indicating a "sell order" for all or part of the securitized certificates. This is the price market participants see across the market.

ISSUER – CERTIFICATE SALE

Once a "Buy-Order" and "Sell-Order" "Match" various documents are distributed to affirm the sale and agreement of associated terms and conditions. Once all documents are fully executed funds and certificates are released from escrow.
